In our CSR journey, we shall selectively deploy our financial resources earmarked for CSR to drive an action agenda in line with Schedule VII of the Companies Act, 2013 as recommended by the CSR Committee/ Board of the Company and overseen by the Management & nominated representatives from the Board of Directors.

The Company's annual CSR budget and efforts shall focus on:

1. Health and Sanitation (Ongoing Projects):

Improving access to healthcare by focussing on developing a high impact, holistic, sustainable and collaborative ecosystem that offers free/ affordable, quality healthcare services to underprivileged population in parts of India where there is limited healthcare infrastructure/ access including undertaking Project Dialysis through Fairfax India Charitable Foundation by collaborating with government on a public private partnership supporting Pradhan Mantri National Dialysis Program or supporting private charitable organization thereby developing access to dialysis at parts of India where there is poor dialysis infrastructure.

Address lack of hygiene and sanitation facilities at tourist spots pan India or on highways enroute to these tourist spots. This will be done by setting up/managing environment friendly toilet facilities and the underprivileged local population will be trained in the upkeep of these facilities.

2. Any Other Project or Programme that falls under the purview of Schedule VII of Section 135 of the Companies Act, 2013, as identified and approved from time to time.

Guiding Principles for selection of CSR Projects/Programmes

Project Dialysis & Clean Sanitation Project are undertaken as an ongoing project for a long term social impact

1. Project Dialysis

Chronic kidney disease (CKD) is on the rise worldwide and in India. Diabetes & hypertension are one of the key factors for CKD. Patients with CKD after a certain stage of kidney damage are not able to remove excess water and toxins from the body through their kidneys and urine & for them to survive and live a productive life; they need to undergo dialysis 2-3 times a week for life long.

It is estimated that there are 1.3 million CKD patients in India who are in need of dialysis. Approximately 200,000 dialysis machines are needed to treat them but only 25,000 dialysis machines are currently available and most of them are at urban India. The cost of dialysis is INR 2,40,000 per year in private setup. The cost further escalates significantly at places where there is no dialysis access, as the patients have to travel long distances to urban areas where the dialysis facilities are available, a family member has to accompany the patients leading to loss of earning hours & many a times the patient family has to relocate to the urban areas to access dialysis. Many a times the dialysis slots are not available due to long waitlist leading to dialysis discontinuation.

Providing access to free / subsidized quality dialysis to areas where there are no or inadequate dialysis facilities helps save life and healthcare expenses of the underprivileged population.

Given their recognition of the critical need for affordable dialysis and the acute shortage of machines, the Company is committed to support Project Dialysis as a long term project for a period of 10 years from 2017-18 till 2026-27.

The commitment is to collaborate with the larger Government/Corporate sector/NGO/CSR/Healthcare Service Provider & partner ecosystem to collectively mobilise the resources to make a significant and meaningful contribution in the form of more than 1000 dialysis machines that will offer affordable/free dialysis in areas of the country where they are most required - to make this life saving service available to the poorest and most deserving.
